

Index for Volume 53 (1982)

This index is composed of three subindexes: I. Bibliographical Index, II. Author Index and III. Topic Index.

Entries in the bibliographical index have been indexed by the last name of the author, or in the case of multiple authors by the last name of the first author. Reference information includes the name(s) of the author(s), title of the article, and the volume number and pages on which the article may be found.

The author index cites the name of each author included in the volume, followed by the volume

number and pages of the article. In cases where the cited author is not the first author of the article, the first author is cited in parentheses, so that the article may then be located in the bibliographical index if desired.

In the topic index, each article is listed under those important subjects about which the article provides information. The article title with volume and page numbers is also given.

I. BIBLIOGRAPHICAL INDEX

- Anderson, Tim and Kearney, Jay T. Effects of three resistance training programs on muscular strength and absolute and relative endurance. *1*, 1-7.
- Ashby, Alan A., Shea, Charles H., and Tolson, Homer. Memory characteristics of two dimensional movement information. *2*, 93-100.
- Boysen, John P. and Francis, Peter R. An evaluation of the instructional effectiveness of a computer lesson in biomechanics. *3*, 232-235.
- Brunt, Denis and Broadhead, Geoffrey D. Motor proficiency traits of deaf children. *3*, 236-238.
- Budney, David R. and Bellow, Donald G. On the swing mechanics of a matched set of golf clubs. *3*, 185-192.
- Burdett, Ray G. Biomechanics of the snatch technique of highly skilled and skilled weightlifters. *3*, 193-197.
- Butts, Nancy Kay. Physiological profiles of high school female cross country runners. *1*, 8-14.
- Chapman, Nancy L. Chapman ball control test—field hockey. *3*, 239-242.
- Clarkson, Priscilla M., Johnson, James, Dextradeur, Dennis, Leszczynski, William, Wai, Jackson, and Melchionda, Anthony. The relationships among isokinetic endurance, initial strength level, and fiber type. *1*, 15-19.
- Cordain, L., Johnson, S. C., and Ruhling, R. D. Description of a low cost microcomputer system interfaced to exercise stress testing equipment. *1*, 73-77.
- Cox, Richard H., Noble, Larry and Johnson, Robert E. Effectiveness of the slide and cross-over steps in volleyball blocking—a temporal analysis. *2*, 101-107.
- Croucher, John S. The effect of the tennis tie-breaker. *4*, 336-339.
- Dapena, Jesús and Teves, Marilyn A. Influence of the diameter of the hammer head on the distance of a hammer throw. *1*, 78-81.
- Del Rey, Patricia, Wughalter, Emily H., and Whitehurst, Michael. The effects of contextual interference on females with varied experience in open sport skills. *2*, 108-115.
- Elliott, Bruce. The influence of tennis racket flexibility and string tension on rebound velocity following a dynamic impact. *4*, 277-281.
- English, Eleanor B. Girolamo Cardano and *De sanitae tuenda*: a Renaissance physician's perspective on exercise. *4*, 282-290.
- Feltz, Deborah L. The effects of age and number of demonstrations on modeling of form and performance. *4*, 291-296.
- Foster, Carl, Pollock, Michael, Farrell, Peter, Maksud, Michael, Anholm, James and Hare, John. Training responses of speed skaters during a competitive season. *3*, 243-246.
- Goldberger, Michael, Gerney, Philip, and Chamberlain, James. The effects of three styles of teaching on the psychomotor performance and social skill development of fifth grade children. *2*, 116-124.

- Jackson, Allen, Bruya, Larry, Baun, William, Richardson, Peggy, Weinberg, Robert and Caton, Irma. Baumgartner's modified pull-up test for male and female elementary school aged children. *2*, 163-164.
- Léger, Luc A. Energy cost of disco dancing. *1*, 46-49.
- Londeree, Ben R. and Moeschberger, Melvin L. Effect of age and other factors on maximal heart rate. *4*, 297-304.
- Mahoney, J. F. Theoretical analysis of aggressive golf putts. *2*, 165-171.
- Massengale, John D. and Sage, George H. Departmental prestige and career mobility patterns of college physical educators. *4*, 305-312.
- McCormick, James H., Subbaiah, Perla and Arnold, Harvey J. A method for identification of some components of judging springboard diving. *4*, 313-322.
- McIntyre, Donald R. and Pfausch, Eric W. A kinematic analysis of the baseball batting swings involved in opposite-field and same-field hitting. *3*, 206-213.
- Meyers, Andrew W., Schleser, Robert, and Okwumabua, Theresa Montgomery. A cognitive behavioral intervention for improving basketball performance. *4*, 344-347.
- Morris, Arlene M., Williams, Jean M., Atwater, Anne E. and Wilmore, Jack H. Age and sex differences in motor performance of 3 through 6 year old children. *3*, 214-221.
- Nolan, Gerald N. and Bates, Barry T. A biomechanical analysis of the effects of two paddle types on performance in North American canoe racing. *1*, 50-57.
- Osternig, Louis R., Sawhill, James A., Bates, Barry T. and Hamill, Joseph. A method for rapid collection and processing of isokinetic data. *3*, 252-256.
- Pollock, Michael L., Foster, Carl, Anholm, James, Hare, John, Farrell, Peter, Maksud, Michael, and Jackson, Andrew S. Body composition of Olympic speed skating candidates. *2*, 150-155.
- Powers, Scott K. and Walker, Richard. Physiological and anatomical characteristics of outstanding female junior tennis players. *1*, 172-175.
- Puhl, Jacqueline, Case, Samuel, Fleck, Steven and Van Handel, Peter. Physical and physiological characteristics of elite volleyball players. *3*, 257-262.
- Ramsey, Jerry D. Environmental heat from synthetic and natural turf. *1*, 82-85.
- Saito, Mitsuru. The effect of training on the relationships among velocity, stroke rate and distance per stroke in untrained subjects swimming the breaststroke. *4*, 323-329.
- Seals, Douglas R. and Mullin, John P. $\dot{V}O_2$ max in variable type exercise among well-trained upper body athletes. *1*, 58-63.
- Shea, Charles H. and Northam, Cheryl. Discrimination of visual linear velocities. *3*, 222-225.
- Shifflett, Bethany and Schuman, Barbara. A criterion-referenced test for archery. *4*, 330-335.
- Snyder, Eldon E. and Purdy, Dean A. Socialization into sport: parent and child reverse and reciprocal effects. *3*, 263-266.
- Spray, Judith A. Effects of autocorrelated errors on intraclass reliability estimation. *3*, 226-231.

- Toole, Tonya and Arink, Elizabeth A. Movement education: its effect on motor skill performance. 2, 156-162.
- Ulrich, David and Parkhouse, Bonnie L. An alumni oriented approach to sport management curriculum design using performance ratings and a regression model. 1, 64-72.
- Washburn, Richard A. and Safrit, Margaret J. Physical performance tests in job selection: a model for empirical validation. 3, 267-270.
- Weltman, Arthur and Regan, John. A reliable method for the measurement of constant load maximal endurance performance on the bicycle ergometer. 2, 176-179.
- Wilkerson, Jerry D., Morrow, James R., Jr., and Disch, James G. The reliability and validity of the handheld planimeter for determining kinetic curve parameters. 2, 180-183.

II. AUTHOR INDEX

- Allen, Jon R. 2, 141-149. (Iso-Ahola)
- Anderson, Tim. 1, 1-7.
- Anholm, James. 2, 150-155. (Pollock)
- Anholm, James. 3, 243-246. (Foster)
- Arink, Elizabeth A. 2, 156-162. (Toole)
- Arnold, Harvey J. 4, 313-322. (McCormick)
- Ashby, Alan A. 2, 93-100.
- Atwater, Anne E. 3, 214-221. (Morris)
- Bates, Barry T. 1, 50-57. (Nolan)
- Bates, Barry T. 3, 252-256. (Osternig)
- Baun, William. 2, 163-164. (Jackson)
- Bellow, Donald G. 3, 185-192. (Budney)
- Boysen, John P. 3, 232-235.
- Broadhead, Geoffrey D. 3, 236-238. (Brunt)
- Brunt, Denis. 3, 236-238.
- Bruya, Larry. 2, 163-164. (Jackson)
- Budney, David R. 3, 185-192.
- Burdett, Ray G. 3, 193-197.
- Butts, Nancy Kay. 1, 8-14.
- Case, Samuel. 3, 257-262. (Puhl)
- Caton, Irma. 2, 163-164. (Jackson)
- Chamberlain, James. 2, 116-124. (Goldberger)
- Chapman, Nancy L. 3, 239-242.
- Clarkson, Priscilla M. 1, 15-19.
- Cordain, L. 1, 73-77.
- Cox, Richard H. 2, 101-107.
- Croucher, John S. 4, 336-339.
- Dapena, Jesús. 1, 78-81.
- Del Rey, Patricia. 2, 108-115.
- DePauw, Karen P. 1, 37-45. (Hall)
- Dextradeur, Dennis. 1, 15-19. (Clarkson)
- Disch, James G. 2, 180-183. (Wilkerson)
- East, Whitfield B. 2, 133-140. (Hensley)
- Elliott, Bruce. 4, 277-281.
- English, Eleanor B. 4, 282-290.
- Farrell, Peter. 2, 150-155. (Pollock)
- Farrell, Peter. 3, 243-246. (Foster)
- Feltz, Deborah L. 4, 291-296.
- Fleck, Steven. 3, 257-262. (Puhl)
- Foster, Carl. 2, 150-155. (Pollock)
- Foster, Carl. 3, 243-246.
- Francis, Peter R. 3, 232-235. (Boysen)
- Gerney, Phillip. 2, 116-124. (Goldberger)
- Gill, Diane L. 2, 125-132. (Gross)
- Goldberger, Michael. 2, 116-124.
- Gray, Gary R. 1, 27-36.
- Greer, Nancy. 4, 340-343.
- Griffey, David C. 1, 20-26.
- Gross, John B. 2, 125-132.
- Gruber, Joseph J. 1, 27-36.
- Hall, Susan J. 1, 37-45.
- Halverson, Lolas E. 3, 198-205.
- Hamill, Joseph. 3, 252-256. (Osternig)
- Hancock, P. A. 3, 247-251.
- Hare, John. 2, 150-155. (Pollock)
- Hare, John. 3, 243-246. (Foster)
- Hensley, Larry D. 2, 133-140.
- Iso-Ahola, Seppo E. 2, 141-149.
- Jackson, Allen. 2, 163-164.
- Jackson, Andrew S. 2, 150-155. (Pollock)
- Johnson, James. 1, 15-19. (Clarkson)
- Johnson, Robert E. 2, 101-107. (Cox)
- Johnson, S. C. 1, 73-77. (Cordain)
- Katch, Frank I. 4, 340-343. (Greer)
- Kearney, Jay T. 1, 1-7. (Anderson)
- Langendorfer, Stephen. 3, 198-205. (Halverson)
- Léger, Luc A. 1, 46-49.
- Leszczynski, William. 1, 15-19. (Clarkson)
- Londeree, Ben R. 4, 297-304.

- Mahoney, J. F. 2, 165-171.
 Maksud, Michael. 2, 150-155. (Pollock)
 Maksud, Michael. 3, 243-246. (Foster)
 Massengale, John D. 4, 305-312.
 McCormick, James H. 4, 313-322.
 McIntyre, Donald R. 3, 206-213.
 Melchionda, Anthony. 1, 15-19. (Clarkson)
 Meyers, Andrew W. 4, 344-347.
 Milner, E. Keith. 3, 247-251. (Hancock)
 Moeschberger, Melvin L. 4, 297-304. (Londeree)
 Morris, Arlene M. 3, 214-221.
 Morrow, James R., Jr. 2, 180-183. (Wilkerson)
 Mullin, John P. 1, 58-63. (Seals)
 Noble, Larry. 2, 101-107. (Cox)
 Nolan, Gerald N. 1, 50-57.
 Northam, Cheryl. 3, 222-225. (Shea)
 Okwumabua, Theresa Montgomery. 4, 344-347. (Meyers)
 Osternig, Louis R. 3, 252-256.
 Parkhouse, Bonnie L. 1, 64-72. (Ulrich)
 Pfautsch, Eric W. 3, 206-213. (McIntyre)
 Pollock, Michael L. 2, 150-155.
 Pollock, Michael L. 3, 243-246. (Foster)
 Powers, Scott K. 1, 172-175.
 Puhl, Jacqueline. 3, 257-262.
 Purdy, Dean A. 3, 263-266. (Snyder)
 Ramsey, Jerry D. 1, 82-85.
 Regan, John. 2, 176-179. (Weltman)
 Richardson, Peggy. 2, 163-164. (Jackson)
 Robertson, Mary Ann. 3, 198-205. (Halverson)
 Ruhling, R. O. 1, 73-77. (Cordain)
 Safrit, Margaret J. 3, 267-270. (Washburn)
 Sage, George H. 4, 305-312. (Massengale)
 Saito, Mitsuru. 4, 323-329.
 Sawhill, James A. 3, 252-256. (Osternig)
 Schleser, Robert. 4, 344-347. (Meyers)
 Schuman, Barbara J. 4, 330-335. (Shifflett)
 Seals, Douglas R. 58-63.
 Shea, Charles H. 2, 93-100. (Ashby)
 Shea, Charles H. 3, 222-225.
 Shifflett, Bethany. 4, 330-335.
 Snyder, Eldon E. 3, 263-266.
 Spray, Judith A. 3, 226-231.
 Stillwell, Jim L. 2, 133-140. (Hensley)
 Subbaiah, Perla. 4, 313-322. (McCormick)
 Teves, Marilyn A. 1, 78-81. (Dapena)
 Tolson, Homer. 2, 93-100. (Ashby)
 Toole, Tonya. 2, 156-162
 Ulrich, David. 1, 64-72.
 Van Handel, Peter. 3, 257-262. (Puhl)
 Wai, Jackson. 1, 15-19. (Clarkson)
 Walker, Richard. 1, 172-175. (Powers)
 Washburn, Richard A. 3, 267-270.
 Weinberg, Robert. 2, 163-164. (Jackson)
 Weltman, Arthur. 2, 176-179.
 Wilkerson, Jerry D. 2, 180-183.
 Williams, Jean M. 3, 214-221. (Morris)
 Wilmore, Jack H. 3, 214-221. (Morris)
 Whitehurst, Michael. 2, 108-115. (Del Rey)
 Wughalter, Emily H. 2, 108-115. (Del Rey)

III. TOPIC INDEX

A

- Age. Effect of — and other factors on maximal heart rate. 4, 297-304.
 Age differences. Age and sex differences in motor performance of 3 through 6 year old children. 3, 214-221.
 Analysis of covariance. Alternate approaches to —: non-simultaneous and simultaneous inference. 1, 20-26.
 Archery. A criterion-referenced test for —. 4, 330-335.
 Athletes. $\dot{V}O_2$ max in variable type exercise among well-trained upper body —. 1, 58-63.

- Autocorrelated errors. Effects of — on intraclass reliability estimation. 3, 226-231.

B

- Bachman ladder. The effects of age and number of demonstrations on modeling of form and performance. 4, 291-296.
 Baseball. A kinematic analysis of the baseball batting swings involved in opposite-field and same-field hitting. 3, 206-213.
 Basketball. A cognitive behavioral intervention for improving — performance. 4, 344-347.

- Basketball competition. Responses to forces influencing cohesion as a function of player status and level of male varsity _____. *1*, 27-36.
- Bench step. Validity of palpation recovery pulse rate to estimate exercise heart rate following four intensities of _____ exercise. *4*, 340-343.
- Biomechanics. An evaluation of the instructional effectiveness of a computer lesson in biomechanics. *3*, 232-235.
- Body composition. _____ of Olympic speed skating candidates. *2*, 150-155.
- Body composition. Physical and physiologic characteristics of elite volleyball players. *3*, 257-262.
- Body composition. Physiological and anatomical characteristics of outstanding female junior tennis players. *2*, 172-175.
- Body composition. Physiological profiles of high school female cross country runners. *1*, 8-14.
- Body composition. Training responses of speed skaters during a competitive season. *3*, 243-246.
- Body fatness. _____ and motor performance during preadolescence. *2*, 133-140.
- Breaststroke. The effect of training on the relationships among velocity, stroke rate and distance per stroke in untrained subjects swimming the breaststroke. *4*, 323-329.

C

- Canoeing. A biomechanical analysis of the effects of two paddle types on performance in North American canoe racing. *1*, 50-57.
- Cardano, Girolamo. Girolamo Cardano and *De sanitae tuenda*: a Renaissance physician's perspective on exercise. *4*, 282-290.
- Cardiorespiratory fitness. Effect of age and other factors on maximal heart rate. *4*, 297-304.
- Cognitive behavioral intervention. A _____ for improving basketball performance. *4*, 344-347.
- Competition. _____ and instructional set effects on the speed and accuracy of a throwing task. *2*, 125-132.
- Computer-assisted instruction. An evaluation of the instructional effectiveness of a computer lesson in biomechanics. *3*, 232-235.
- Computer processing. A method for rapid collection and processing of isokinetic data. *3*, 252-256.
- Computer system. Description of a low cost micro-computer system interfaced to exercise stress testing equipment. *1*, 73-77.
- Contextual interference. The effects of _____ on females with varied experience in open sport skills. *2*, 108-115.

- Criterion-referenced measurement. Physical performance tests in job selection: a model for empirical validation. *3*, 267-270.
- Criterion-referenced test. A _____ for archery. *4*, 330-335.
- Curriculum design. An alumni oriented approach to sport management _____ using performance ratings and a regression model. *1*, 64-72.

D

- Deaf. Motor proficiency traits of _____ children. *3*, 236-238.
- Disco dancing. Energy cost of _____. *1*, 46-49.
- Diving competition (judging of). A method for identification of some components of judging springboard diving. *4*, 313-322.

E

- Endurance training. Effects of three resistance training programs on muscular strength and absolute and relative endurance. *1*, 1-7.
- Energy expenditure. Energy cost of disco dancing. *1*, 46-49.
- Exercise. A reliable method for the measurement of constant load maximal endurance performance on the bicycle ergometer. *2*, 176-179.
- Exercise. Girolamo Cardano and *De sanitae tuenda*: a Renaissance physician's perspective on _____. *4*, 282-290.

F

- Fatigue curves. The relationships among isokinetic endurance, initial strength level, and fiber type. *1*, 15-19.
- Female athletes. The effects of contextual interference on females with varied experience in open sport skills. *2*, 108-115.
- Female athletes (tennis players). Physiological and anatomical characteristics of outstanding female junior tennis players. *2*, 172-175.
- Fiber type. The relationships among isokinetic endurance, initial strength level, and _____. *1*, 15-19.
- Field hockey. Chapman ball control test—_____. *3*, 239-242.

G

- Golf. Theoretical analysis of aggressive _____ putts. *2*, 165-171.
- Golf clubs. On the swing mechanics of a matched set of _____. *3*, 185-192.

- Graduate departments (physical education). Departmental prestige and career mobility patterns of college physical educators. *4*, 305-312.
- Grip strength. Physiological and anatomical characteristics of outstanding female junior tennis players. *2*, 172-175.

H

- Hammer throw. Influence of the diameter of the hammer head on the distance of a _____. *1*, 78-81.
- Hearing impaired. Motor proficiency traits of deaf children. *3*, 236-238.
- Heart rate. Validity of palpation recovery pulse rate to estimate exercise ____ following four intensities of bench step exercise. *4*, 340-343.

I

- Instructional sets. Competition and instructional set effects on the speed and accuracy of a throwing task. *2*, 125-132.
- Isokinetic strength and endurance. The relationships among isokinetic endurance, initial strength level, and fiber type. *1*, 15-19.
- Isokinetics. A method for rapid collection and processing of isokinetic data. *3*, 252-256.

K

- Kinetics. The reliability and validity of the handheld planimeter for determining kinetic curve parameters. *2*, 180-183.

L

- Leisure, motivation and needs. The dynamics of leisure motivation: the effects of outcome on leisure needs. *2*, 141-149.

M

- Maximal heart rate. Effect of age and other factors on _____. *4*, 297-304.
- Model. A photogrammetrically based ____ for predicting total body mass centroid location. *1*, 37-45.
- Modeling. The effects of age and number of demonstrations on ____ of form and performance. *4*, 291-296.
- Mosston's spectrum of teaching styles. The effects of three styles of teaching on the psychomotor performance and social skill development of fifth grade children. *2*, 116-124.

- Motor development. Development of the overarm throw: movement and ball velocity changes by seventh grade. *3*, 198-205.

- Motor learning. Memory characteristics of two dimensional movement information. *2*, 93-100.

- Motor learning. The effects of age and number of demonstrations on modeling of form and performance. *4*, 291-296.

- Motor memory. Memory characteristics of two dimensional movement information. *2*, 93-100.

- Motor performance. Body fatness and ____ during preadolescence. *2*, 133-140.

- Motor performance tests. Age and sex differences in motor performance of 3 through 6 year old children. *3*, 214-221.

- Motor performance, motor learning. Movement education: its effect on motor skill performance. *2*, 156-162.

- Motor proficiency. ____ traits of deaf children. *3*, 236-238.

- Movement education. ____: its effect on motor skill performance. *2*, 156-162.

- Muscular strength. Effects of three resistance training programs on ____ and absolute and relative endurance. *1*, 1-7.

- Muscular strength, endurance. Baumgartner's modified pull-up test for male and female elementary school aged children. *2*, 163-164.

O

- Overarm throw. Development of the ____: movement and ball velocity changes by seventh grade. *3*, 198-205.

P

- Paddles (canoe). A biomechanical analysis of the effects of two paddle types on performance in North American canoe racing. *1*, 50-57.

- Photogrammetrically based model. A ____ for predicting total body mass centroid location. *1*, 37-45.

- Physical educators. Departmental prestige and career mobility patterns of college _____. *4*, 305-312.

- Physical fitness tests. Validity of palpation recovery pulse rate to estimate exercise heart rate following four intensities of bench step exercise. *4*, 340-343.

- Physical performance tests. ____ in job selection: a model for empirical validation. *3*, 267-270.

- Planimeter. The reliability and validity of the handheld ____ for determining kinetic curve parameters. *2*, 180-183.

PLATO (computer system). An evaluation of the instructional effectiveness of a computer lesson in biomechanics. *3*, 232-235.

Preadolescence. Body fatness and motor performance during _____. *2*, 133-140.

Pull-up. Baumgartner's modified ____ test for male and female elementary school aged children. *2*, 163-164.

R

Reliability. Effects of autocorrelated errors on intraclass ____ estimation. *3*, 226-231.

Retention processes. Memory characteristics of two dimensional movement information. *2*, 93-100.

S

SCUBA. Mental and psychomotor task performance in an open ocean underwater environment. *3*, 247-251.

Sex differences. Age and ____ in motor performance of 3 through 6 year old children. *3*, 214-221.

Simultaneous inference. Alternate approaches to analysis of covariance: non-simultaneous and simultaneous inference. *1*, 20-26.

Skaters. Body composition of Olympic speed skating candidates. *2*, 150-155.

Skaters. Training responses of speed ____ during a competitive season. *3*, 243-246.

Socialization. ____ into sport: parent and child reverse and reciprocal effects. *3*, 263-266.

Spectrum of teaching styles. The effects of three styles of teaching on the psychomotor performance and social skill development of fifth grade children. *2*, 116-124.

Sport management. An alumni oriented approach to ____ curriculum design using performance ratings and a regression model. *1*, 64-72.

Strength training. Effects of three resistance training programs on muscular strength and absolute and relative endurance. *1*, 1-7.

Stress testing equipment. Description of a low cost microcomputer system interfaced to exercise _____. *1*, 73-77.

Success-failure. The dynamics of leisure motivation: the effects of outcome on leisure needs. *2*, 141-149.

Swimming. The effect of training on the relationships among velocity, stroke rate and distance per stroke in untrained subjects swimming the breaststroke. *4*, 323-329.

Synthetic turf. Environmental heat from synthetic and natural turf. *1*, 82-85.

T

Teaching behavior. The effects of three styles of teaching on the psychomotor performance and social skill development of fifth grade children. *2*, 116-124.

Tennis. The effect of the tennis tie-breaker. *4*, 336-339.

Tennis string tension. The influence of tennis racket flexibility and string tension on rebound velocity following a dynamic impact. *4*, 277-281.

Test (for motor performance, athletic skill). Chapman ball control test—field hockey. *3*, 239-242.

Track and field. Influence of the diameter of the hammer head on the distance of a hammer throw. *1*, 78-81.

Training. Body composition of Olympic speed skating candidates. *2*, 150-155.

Training, intensity and duration. Effects of three resistance training programs on muscular strength and absolute and relative endurance. *1*, 1-7.

Training. ____ responses of speed skaters during a competitive season. *3*, 243-246.

Training (transfer of). Movement education: its effect on motor skill performance. *2*, 156-162.

Training specificity. $\dot{V}O_2$ max in variable type exercise among well-trained upper body athletes. *1*, 58-63.

Treadmill $\dot{V}O_2$ max. Physiological profiles of high school female cross country runners. *1*, 8-14.

U

Underwater performance. Mental and psychomotor task performance in an open ocean underwater environment. *3*, 247-251.

V

Visual discrimination. Discrimination of visual linear velocities. *3*, 222-225.

$\dot{V}O_2$ max. A reliable method for the measurement of constant load maximal endurance performance on the bicycle ergometer. *2*, 176-179.

$\dot{V}O_2$ max. ____ in variable type exercise among well-trained upper body athletes. *1*, 58-63.

Volleyball. Effectiveness of the slide and cross-over steps in ____ blocking—a temporal analysis. *2*, 101-107.

Volleyball. Physical and physiological characteristics of elite ____ players. *3*, 257-262.

W

Weightlifting. Biomechanics of the snatch technique of highly skilled and skilled weightlifters. *3*, 193-197.
